# Chapter 1 — The Warp and psychic travel

The Warp, also called the Immaterium, is a parallel dimension associated with psychic energy and emotion. It enables faster-than-light travel but is unstable and dangerous.

Navigators and specialized technology help Imperial ships cross warp space. The Astronomican serves as a psychic beacon for navigation across much of the Imperium.

Warp travel is not perfectly predictable: ships may be delayed, lost, or exposed to entities from the Immaterium.

# Chapter 2 — Chaos and its four major gods

Chaos is associated with powerful warp entities fed by mortal emotions and actions. Four major Chaos Gods dominate many accounts: Khorne, Tzeentch, Nurgle, and Slaanesh.

Khorne is associated with bloodshed and martial fury; Tzeentch with change, ambition, and sorcery; Nurgle with decay, disease, and endurance; Slaanesh with excess and obsession.

Chaos factions are not uniform. Rival gods, warbands, cults, and daemonic forces pursue competing goals and frequently fight one another.

# Chapter 3 — Space Marines and their Chapters

Space Marines, or Adeptus Astartes, are genetically enhanced human warriors organized into Chapters in the later Imperium. Their equipment includes power armor, bolters, and specialized vehicles.

Different Chapters maintain distinctive traditions and doctrines. The Ultramarines emphasize organization, while other Chapters prioritize stealth, siege warfare, speed, or close combat.

Space Marines are rare compared with the broader Imperial population. Their stories are prominent, but ordinary soldiers and civilians carry much of the Imperium’s burden.

# Chapter 4 — Astra Militarum and the Imperial war machine

The Astra Militarum, often called the Imperial Guard, supplies immense armies of ordinary human soldiers from many worlds. Their regiments vary in training, uniforms, and battlefield doctrine.

Tanks, artillery, infantry, and logistics enable these forces to fight wars on a scale beyond the reach of Space Marine Chapters alone.

The Imperial Navy, Adeptus Mechanicus, and other organizations contribute ships, technology, intelligence, and support. Imperial power is institutional rather than a single unified army.

# Chapter 5 — Orks and their culture

Orks are aggressive, resilient aliens whose societies are built around conflict, hierarchy, and collective enthusiasm for battle. Their warbands can grow into massive Waaagh! invasions.

Ork technology often appears improvised, but their Mekboyz construct functioning weapons, vehicles, and machines through a mixture of inherited instinct and practical experimentation.

Orks are dangerous partly because they reproduce and spread widely. Even a defeated invasion may leave future threats behind.

# Chapter 6 — Aeldari and Drukhari

The Aeldari are an ancient psychic species whose civilization suffered a catastrophic Fall associated with the birth of Slaanesh. Surviving groups adopted very different ways of life.

Craftworld Aeldari preserve disciplined cultural paths and live aboard vast world-ships. Harlequins serve enigmatic purposes linked to Aeldari myth and performance.

Drukhari inhabit Commorragh and sustain their society through raiding and cruelty. These branches share ancestry but not a single political agenda.

# Chapter 7 — Necrons and ancient dynasties

Necrons are ancient mechanical beings whose dynasties awaken from long periods of dormancy. Their history includes the transformation of the Necrontyr through biotransference.

Necron armies employ advanced technology, self-repairing constructs, and powerful weapons. Tomb worlds may lie hidden beneath apparently ordinary planets.

Different dynasties and rulers have distinct ambitions. Some seek restoration of former glory, while others are concerned with survival, identity, or the consequences of their transformation.

# Chapter 8 — Tyranids and the Hive Mind

Tyranids are extragalactic organisms organized into hive fleets. Their many biological forms are coordinated through the Hive Mind, a vast collective intelligence.

They consume biomass and adapt their forces to different opponents. Genestealer Cults may infiltrate populations ahead of a larger Tyranid invasion.

The Tyranid threat is difficult to measure because only portions of the greater swarm have been encountered within the galaxy.

# Chapter 9 — T’au Empire and the Greater Good

The T’au are a relatively young spacefaring civilization that promotes the philosophy of the Greater Good. Their military doctrine emphasizes coordinated firepower, battlesuits, and combined arms.

The T’au Empire includes allied species and uses diplomacy as well as conquest to expand. Its political structure and social expectations are not universally accepted by outsiders.

Compared with the Imperium, T’au technology is often portrayed as more actively developed, although their empire is much smaller in territorial reach.

# Chapter 10 — Why factions keep fighting

Warhammer 40,000 has no simple two-sided war. Territorial expansion, survival, ideology, religious devotion, ancient grudges, and the influence of Chaos generate overlapping conflicts.

A planet may attract multiple factions for different reasons: strategic routes, industrial capacity, archaeological artifacts, psychic phenomena, or biological resources.

Understanding the setting requires separating faction propaganda from the broader picture. Each faction’s narrative explains its own motivations, not necessarily a neutral account of the galaxy.
